PROJECTS

Snake Game — Python

Created a Snake game in Python using Turtle graphics. Implemented real-time movement, random food placement, dynamic score tracking, and snake growth. Incorporated keyboard controls, collision detection, and smooth animation for an engaging user experience.

Exercise Tracker Application — Python

Developed a Python-based Exercise Tracker that allows users to log workout details, including exercise type, duration, and calories burned. Integrated Nutritionix API for exercise data and Sheety API to store the logs in Google Sheets. Utilized environment variables for secure API key management and real-time data logging

Password Manager — Python

A Tkinter-based Python app for securely generating, storing, and retrieving passwords. It stores data in a local JSON file and allows users to manage login details for websites through a simple interface
